SEWP VI Contract #: 80TECH26D0591
Category A – ITC/AV Solutions
Contract Type: IDIQ
Contract PoP: 11/1/2026 – 10/31/2036
UEI: S2Q8MLDMFCY8
Primary NAICS: 541519

Service-Disabled Veteran-Owned Small Business; HUB Zone Certified Small Business
Main Office Address: 1 Corwin Ct., Ste. 103; Newburgh, NY 12550

enDevelopment OVERVIEW

Founded in 2006, enDevelopment is a public-sector focused IT Value-Added Reseller (VAR) with experience supplying a wide range of IT hardware, software, and cybersecurity solutions to federal government agencies (CONUS/OCONUS).

SEWP OVERVIEW

The NASA SEWP (Solutions for Enterprise-Wide Procurement) GWAC (Government-Wide Acquisition Contract) provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape. All awards are indefinite-delivery/indefinite-quantity (IDIQ) contracts.

SEWP VI Contracts in Category A, ITC/AV Solutions, include servers, desktops and laptops, network equipment, storage systems, security tools, cloud-based services, software, video conferencing systems, supporting equipment, and associated training, installation, and implementation services.

FAIR OPPORTUNITY

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding \$10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool (QRT) is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP QRT will automatically include the Contract Holders within a selected Group or based on a suggested source.

HOW TO GET A QUOTE

The SEWP QRT is the primary and recommended method for requesting quotes. The QRT allows ordering agencies to issue Requests for Quotes (RFQs), Requests for Information (RFIs), and Market Research Requests (MRRs) to SEWP contract holders. The SEWP QRT will automatically include the Contract Holders within a selected Group or based on a suggested source.

ORDERING PROCESS

The internal ordering process of each Agency varies. The process and accompanying forms for Purchase Requests (PR) and Delivery Orders (DO) that are issued against a SEWP contract are defined by the issuing Agency, not the NASA SEWP Program Management Office (PMO). The typical process is for an end-user to determine a requirement and generate a Purchase Request (PR).

The PR along with any necessary funding information is sent to that Agency's procurement office which results in the issuance of a DO. Any valid Federal Agency DO form, and the associated Delivery Order number may be used. The NASA SEWP Program Management Office (PMO) does not issue DOs - these must be issued through the issuing Agency's procurement office. The SEWP Program Management Office (PMO) reviews, processes and tracks issued DOs and forwards them to the Contract Holder(s).

Some Agencies have special requirements for issuing IT Delivery Orders. It is the Issuing Agency's Contracting Officers' (COs/KOs) responsibility to be aware of any Agency-specific policies regarding issuing orders via an existing contract vehicle and Government-Wide Acquisition Contracts. There are no requirements under the SEWP Contracts for issuing Agencies to use other intermediary procurement offices, except as directed through their own internal policies.

If modifications are made to any order, these modifications must also route through the SEWP Program Management Office (PMO).
